# ZLJ5121THB (K17039) 174KW

## Main Features

### 1.Stability:

- Special hydraulic system with double pump and double circuits: compared with single pump double circuits, the pumping system and distributing system are driven by two independent pumps that allow a more stable oil flow rate to the pumping unit.
- Intelligent control system: advanced technology, easy operation and high reliability electrical system.

### 2.High efficiency:

- Hopper: High Suction Capacity due to Large Angle Fluent Hopper Design with less feed accumulation area.
- S valve: well designed S valve ensure the smooth flow of concrete.
- Rapid concrete piston substitution: the pistons can be changed easily by a single operator without any special tools in 15minutes. The hydraulic cylinder has an extra stroke to allow the piston to extend from the concrete cylinder.

### 3.Energy save:

- Low running costs.
- Hydraulic oil treatment: equipped with multistage fine filtration and water separation devices, to extend hydraulic components lifetime and reduce oil changes.
- Super wear-resistant component: special steel alloy made spectacles wear plate and cutting ring plus high wear-resistant cast steel material made mixing blade, ensuring a longer lifetime of weary spare parts.
- Hydraulic Low / High Pressure Mode Shifting: high/low pressure working mode is easily selected at the press of a button for variable heights of pumping.

### 4. High mobility

- can move freely to adapt to multiple jobsites.

## Standard equipment

- Four hydraulic outriggers
- high-low pressure shifting
- air-cooling device
- Electric display screen
- Quick-release piston
- Air cleaning machine
- Auto lubricating system

## Optional

- Electric vibrator on grid

## Technical data

| Model                           |       | ZU5121THB<br>(K17039) 174KW |
|---------------------------------|-------|-----------------------------|
| Drive power                     | kW    | 174                         |
| Max. Concrete Output            | m³/h  | 90/57                       |
| Max. Concrete Pressure          | bar   | 90/140                      |
| Concrete Cylinder(diamx stroke) | mm    | 230X1650                    |
| Strokes                         | 1/min | 22/14                       |
| Hopper Capacity                 | L     | 600                         |
| Filling height                  | mm    | 1450                        |
